# CAP NEWS – TAMS Partial Ship Refresher

Vol. 2 – 04/01/2024

## How to Receive Partial Shipments in TAMS

### What is a Partial Shipment?

Partial Shipments occur when factory direct orders are fulfilled from multiple locations or stock orders arrive in multiple shipments at different times.

### What Problems Can Occur?

When an entire Purchase Order is posted to inventory without flagging the partial ship items, the store will have to manually adjust the inventory once the remaining portion of the inventory is received.

# CAP NEWS – NAPA Know How

Vol. 2 – 04/01/2024

## CLEARING THE AIR: 5 THINGS YOU MAY NOT KNOW ABOUT CABIN FILTERS.

**1.The Air Inside Your Vehicle Can Be 6 Times More Polluted Than The Air Outside:** Without proper filtration, the air inside the passenger cabin can be teeming with allergens, pollutants and other disgusting microbes. That suggests a significant health risk for children, the elderly and more than 40 million allergy-sensitive North Americans.

**2.Air Quality Threats Abound:** Cabin air filters block airborne contaminants: [pollen](#), dust, car exhaust, toxins, pollutants, allergens, wind-blown industrial soot, the smelly build-up caused by mold, mildew, algae and fungi and more.

**3.Protection For Your Heating & HVAC Systems:** Without a clean, functioning cabin air filter, microscopic contaminants are pushed into your car, much of it through vents. A dirty cabin air filter can degrade and potentially damage your vehicle's heating and air conditioning systems.

**4.You May Already Have One:** If you have a 2000 or newer vehicle, you probably have one. While 95 percent of vehicle owners surveyed recently said they are concerned about in-car air quality, only 26 percent said they knew or thought they knew there was a cabin air filter in their vehicle.

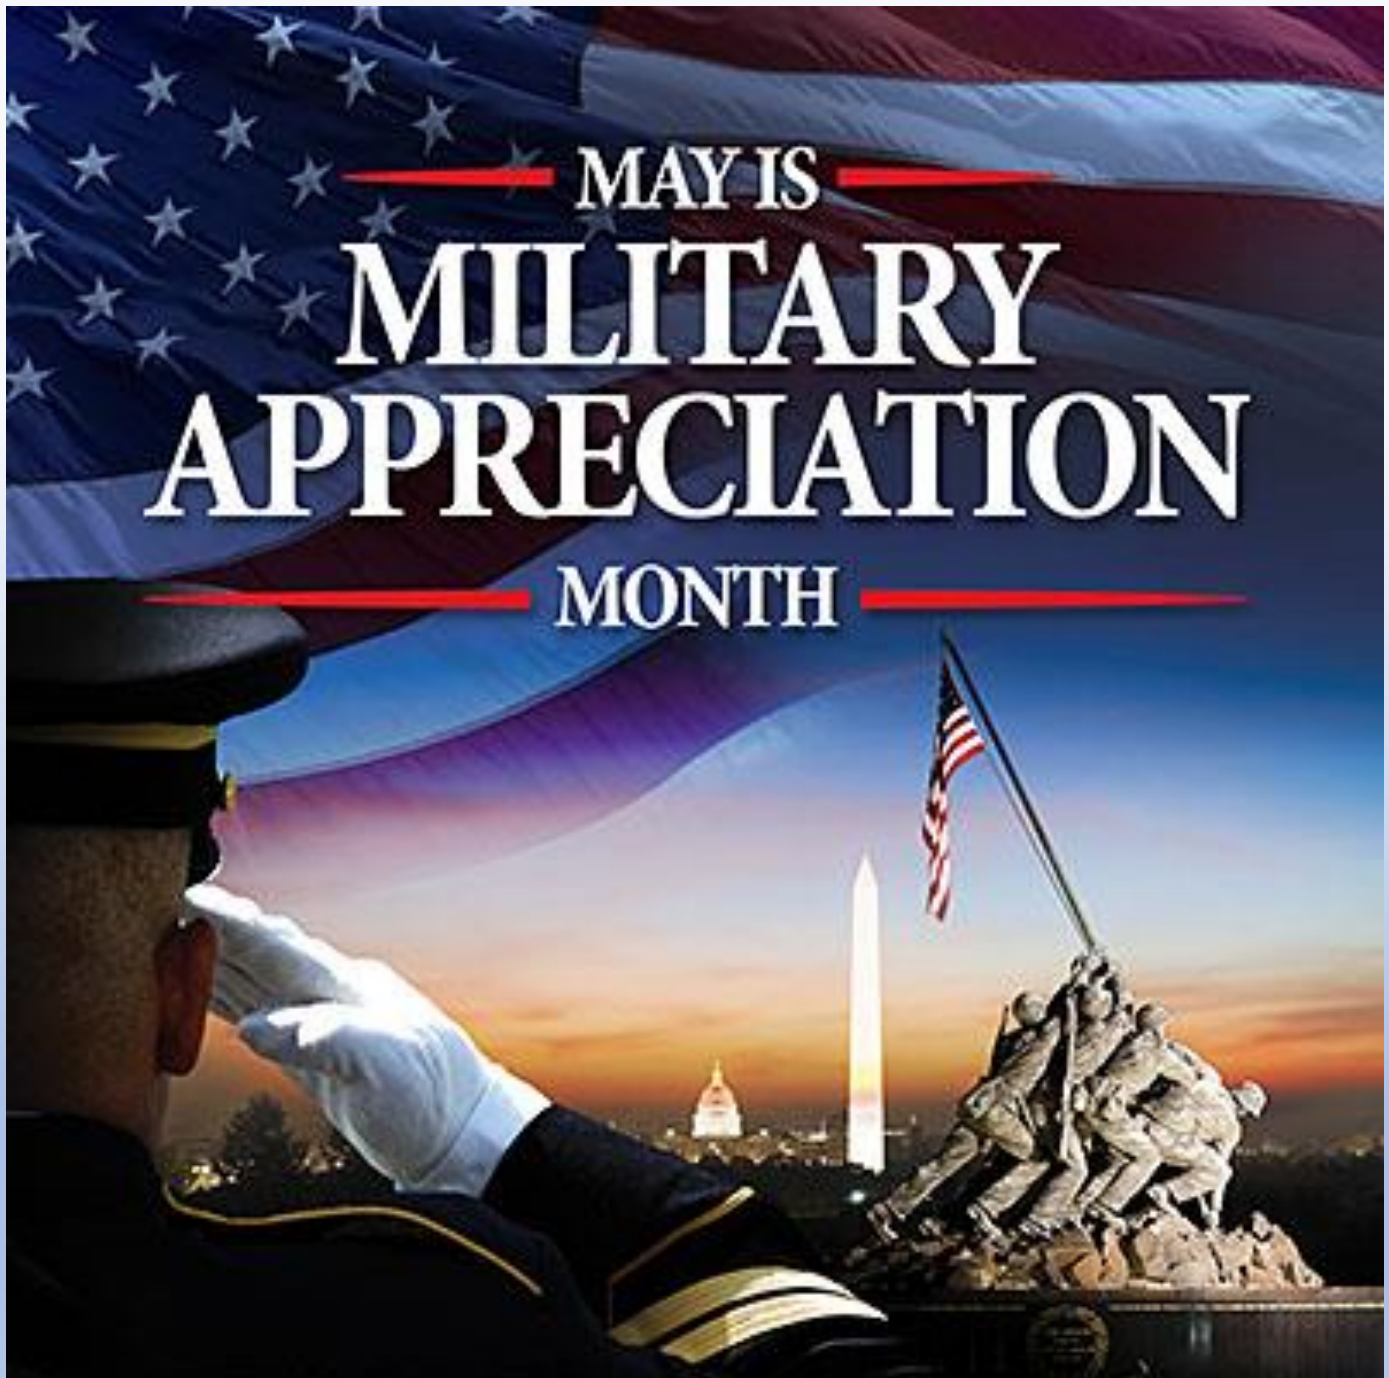

**5.Cabin Air Filter Replacement Schedule:** Driving conditions will determine how often a cabin air filter needs replacing. Dirt roads, dusty areas and urban stop-and-go traffic shorten a cabin air filter's life, Most vehicle manufacturers suggest cabin air filters be replaced every 12 months or 12,000 miles.
